Communication and power line hardware

Legal Notice for Standards

Canadian Standards Association (operating as “CSA Group”) develops standards through a consensus standards development process approved by the Standards Council of Canada. This process brings together volunteers representing varied viewpoints and interests to achieve consensus and develop a standard. Although CSA Group administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document’s fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party’s intellectual property rights. CSA Group does not warrant the accuracy, completeness, or currency of any of the information published in this document. CSA Group makes no representations or warranties regarding this document’s compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL CSA GROUP, ITS VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF CSA GROUP HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, CSA Group is not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and CSA Group accepts no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

CSA Group is a private not-for-profit company that publishes voluntary standards and related documents. CSA Group has no power, nor does it undertake, to enforce compliance with the contents of the standards or other documents it publishes.

Intellectual property rights and ownership

As between CSA Group and the users of this document (whether it be in printed or electronic form), CSA Group is the owner, or the authorized licensee, of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. Without limitation, the unauthorized use, modification, copying, or disclosure of this document may violate laws that protect CSA Group’s and/or others’ intellectual property and may give rise to a right in CSA Group and/or others to seek legal redress for such use, modification, copying, or disclosure. To the extent permitted by licence or by law, CSA Group reserves all intellectual property rights in this document.

Patent rights

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights. CSA Group shall not be held responsible for identifying any or all such patent rights. Users of this standard are expressly advised that determination of the validity of any such patent rights is entirely their own responsibility.

Authorized use of this document

This document is being provided by CSA Group for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by CSA Group to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from CSA Group; or
- make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

Item Standard C83.85-17	— Clevis nut	207
Item Standard C83.86-17	— Prevailing torque locknut	209
Item Standard C83.87-17	— Guy strain plate	210
Item Standard C83.88-17	— Straight crossarm insulator pin	212
Item Standard C83.89-17	— Angle pole top insulator pin	215
Item Standard C83.90-17	— Straight pole top insulator pin	218
Item Standard C83.91-17	— Angle crossarm insulator pin	220
Item Standard C83.92-17	— Lead thread	223
Item Standard C83.93-17	— Detachable pole step	225
Item Standard C83.94-17	— Support for detachable pole step	227
Item Standard C83.95-17	— Transformer cluster mount	229
Item Standard C83.96-17	— Drive ring	232
Item Standard C83.97-17	— Bridle ring	235
Item Standard C83.98-17	— Thimble eye nut	237
Item Standard C83.99-17	— Secondary spool rack	239

Item Standard C83.100-17	— Guy attachment	242
Item Standard C83.101-17	— Fetter drive screw	245
Item Standard C83.102-17	— Drop lead insulator pin	247
Item Standard C83.103-17	— Pole step	249
Item Standard C83.104-17	— Conical-disc spring (Belleville) washer	251
Item Standard C83.105-17	— Neutral conductor bracket	253
Item Standard C83.106-17	— Reinforcing strap	255
Item Standard C83.107-17	— Wall strap	257
Item Standard C83.108-17	— U-wall strap	259
Item Standard C83.109-17	— Clevis pin	261
Item Standard C83.110-17	— Cable strap	263
Item Standard C83.111-17	— Wedge grip	265
Item Standard C83.112-17	— Screw earth anchor	268
Item Standard C83.113-17	— Chain link	271
Item Standard C83.114-17	— Rock anchor extension rod	274
Item Standard C83.115-17	— Shackle	276
Item Standard C83.116-17	— Angle pole top bracket	279
Item Standard C83.117-17	— Three-phase equipment bracket	281
Item Standard C83.118-17	— Single-phase equipment bracket	284
Item Standard C83.119-17	— Socket ball fitting	287
Item Standard C83.120-17	— Socket eye fitting	290
Item Standard C83.121-17	— Socket clevis fitting	293
Item Standard C83.122-17	— Plate clevis	296
Item Standard C83.123-17	— Straight pole top bracket	299
Item Standard C83.124-17	— Insulator cotter key	301
Item Standard C83.125-17	— Thimble clevis	303
Item Standard C83.126-17	— Triangular yoke plate	306
Item Standard C83.127-17	— Bevelled washer	308
Item Standard C83.128-17	— Turnbuckle	310
Item Standard C83.129-17	— Steel strand grip	313
Item Standard C83.131-17	— Swivel clevis	316
Item Standard C83.132-17	— In-span bracket	319
Item Standard C83.133-17	— Oval-eye ball fitting	321
Item Standard C83.134-17	— Ball Y-clevis fitting	324
Item Standard C83.135-17	— Heavy duty pole band	327
Item Standard C83.136-17	— Angle crossarm insulator bracket	329
Item Standard C83.137-17	— Bearing plate for composite poles	332
Item Standard C83.138-17	— Corner construction bracket	334
Item Standard C83.139-17	— Deadend tee	336
Item Standard C83.140-17	— Adjustable thrust fitting	338
Item Standard C83.141-17	— Sag adjuster assembly	340
Item Standard C83.142-17	— Centre phase assembly	342
Item Standard C83.143-17	— Guy tee	345
Item Standard C83.144-17	— Steel crossarm	347
Item Standard C83.145-17	— Auxiliary eye	350
Item Standard C83.146-17	— Non-metallic cable rack	352
Item Standard C83.147-17	— Non-metallic cable rack hook	354
Item Standard C83.148-17	— Triple guy assembly	356
Annex A (informative)	— Sampling procedures	359

Annex B (informative) — Sampling inspection by variables	373
Annex C (informative) — Cross reference of standards and property classes for metric and imperial fasteners	376
Annex D (informative) — Corona testing of fittings	377
Annex E (informative) — Voltage gradient calibrator	382
Annex F (informative) — Design rationale for transmission line fittings	384
Annex G (informative) — Threaded items in tension	387
Annex H (Informative) — Hardness measurements for process control	388

Preface

This is the fourth edition of CSA C83, *Communication and power line hardware*. It supersedes previous editions published in 1996, 1987, 1980, 1970, 1964, 1954, 1950, and 1942.

Changes to this edition include the following:

- a) General requirements for hardware used in the construction of communication and power lines have been updated.
- b) Approximately 50 Item Standards have been updated including several incorporating imperial dimensions for those instances where metric products are typically not utilized.
- c) Fourteen new Item Standards have been included as follows:
 - i) C83.116, Angle pole top bracket;
 - ii) C83.135, Heavy duty pole band
 - iii) C83.136, Angle crossarm insulator bracket;
 - iv) C83.137, Bearing plate for composite poles;
 - v) C83.138, Corner construction bracket;
 - vi) C83.139, Deadend tee;
 - vii) C83.140, Adjustable thrust fitting;
 - viii) C83.141, Sag adjuster assembler;
 - ix) C83.142, Centre phase assembly;
 - x) C83.143, Single guying tee;
 - xi) C83.144, Steel crossarm;
 - xii) C83.145, Auxiliary eye;
 - xiii) C83.146, Cable rack;
 - xiv) C83.147, Non-metallic cable rack hook; and
 - xv) C83.148, Triple guy assembly.

This Standard was prepared by the Technical Committee on Communication and Power Line Hardware, under the jurisdiction of the Strategic Steering Committee on Power Engineering and Electromagnetic Compatibility (SCOPE), and has been formally approved by the Technical Committee.

Notes:

- 1) *Use of the singular does not exclude the plural (and vice versa) when the sense allows.*
- 2) *Although the intended primary application of this Standard is stated in its Scope, it is important to note that it remains the responsibility of the users of the Standard to judge its suitability for their particular purpose.*
- 3) *This Standard was developed by consensus, which is defined by CSA Policy governing standardization — Code of good practice for standardization as “substantial agreement. Consensus implies much more than a simple majority, but not necessarily unanimity”. It is consistent with this definition that a member may be included in the Technical Committee list and yet not be in full agreement with all clauses of this Standard.*
- 4) *To submit a request for interpretation of this Standard, please send the following information to inquiries@csagroup.org and include “Request for interpretation” in the subject line:*
 - a) *define the problem, making reference to the specific clause, and, where appropriate, include an illustrative sketch;*
 - b) *provide an explanation of circumstances surrounding the actual field condition; and*
 - c) *where possible, phrase the request in such a way that a specific “yes” or “no” answer will address the issue.*

Committee interpretations are processed in accordance with the CSA Directives and guidelines governing standardization and are available on the Current Standards Activities page at standardsactivities.csa.ca.

- 5) *This Standard is subject to review within five years from the date of publication. Suggestions for its improvement will be referred to the appropriate committee. To submit a proposal for change, please send the following information to inquiries@csagroup.org and include "Proposal for change" in the subject line:*
- a) *Standard designation (number);*
 - b) *relevant clause, table, and/or figure number;*
 - c) *wording of the proposed change; and*
 - d) *rationale for the change.*

C83-17

Communication and power line hardware

1 Scope

1.1

This Standard covers the general requirements for hardware used in the construction of communication lines and power lines including distribution and transmission lines.

1.2

Detailed requirements for individual items of hardware as numerically listed in Table 5 are covered in separate Item Standards, e.g., C83.46 for cable rack; C83.49 for strain link; C83.75 for thimble guy rod.

Notes:

- 1) *Table 5 provides a numerical listing of the Item Standards and Table 6 provides a listing of Item Standards by subject.*
- 2) *Annexes A and B provide information on sampling and inspection of line hardware. Annexes A and B are included to assist those unfamiliar with statistical sampling or in need of ready reference for sampling plans acceptable to industry in general. The presence of the sampling tables in the appendices should not be thought to preclude the use of any other sampling plans that will satisfy the AQL requirements specified in the Standard for inspection purposes.*
- 3) *Annex C provides a cross reference of comparable Standards and property classes for metric and imperial fasteners. It is intended to be referred to and accepted by the manufacturer and purchaser until such time as metric fasteners become readily available.*
- 4) *Annexes D and E provide information for the corona testing of transmission line hardware fittings.*
- 5) *Annex F provides design rationale for the transmission line fittings.*
- 6) *Annex G provides recommendations for the everyday load limits for threaded items in tension.*
- 7) *Annex H provides information on hardness measurements for process control of steel items.*
- 8) *For information on grades of construction and strength requirements for overhead lines, see CSA C22.3 No. 1.*

1.3

In this Standard, “shall” is used to express a requirement, i.e., a provision that the user is obliged to satisfy in order to comply with the Standard; “should” is used to express a recommendation or that which is advised but not required; and “may” is used to express an option or that which is permissible within the limits of the Standard.

Notes accompanying clauses do not include requirements or alternative requirements; the purpose of a note accompanying a clause is to separate from the text explanatory or informative material.

Notes to tables and figures are considered part of the table or figure and may be written as requirements.

Annexes are designated normative (mandatory) or informative (non-mandatory) to define their application.
