

ATIS-0800040

IPTV MPEG TRANSPORT STREAM MONITORING

ATIS is the leading technical planning and standards development organization committed to the rapid development of global, market-driven standards for the information, entertainment and communications industry. More than 250 companies actively formulate standards in ATIS' 18 Committees, covering issues including: IPTV, Service Oriented Networks, Energy Efficiency, IP-Based and Wireless Technologies, Quality of Service, and Billing and Operational Support. In addition, numerous Incubators, Focus and Exploratory Groups address emerging industry priorities including "Green", IP Downloadable Security, Next Generation Carrier Interconnect, IPv6 and Convergence.

ATIS is the North American Organizational Partner for the 3rd Generation Partnership Project (3GPP), a member and major U.S. contributor to the International Telecommunication Union (ITU) Radio and Telecommunications' Sectors, and a member of the Inter-American Telecommunication Commission (CITEL). For more information, please visit < <http://www.atis.org> >.

IPTV MPEG TRANSPORT STREAM MONITORING

Alliance for Telecommunications Industry Solutions

Approved May 18, 2010

Abstract

This recommended practice provides a common methodology for describing Transport Stream conformance criteria. It explicitly describes the elements and parameters that should be verified in an ATIS IIF-compliant Transport Stream for it to be considered a proper emission. This document incorporates by reference all of SCTE-142, except where explicitly extended or constrained.

FOREWORD

The Alliance for Telecommunication Industry Solutions (ATIS) serves the public through improved understanding between carriers, customers, and manufacturers. The IPTV Interoperability Forum (IIF) develops requirements, standards, and specifications that will determine the industry's end-to-end solution for Internet Protocol Television (IPTV).

The mandatory requirements are designated by the word *shall* and recommendations by the word *should*. Where both a mandatory requirement and a recommendation are specified for the same criterion, the recommendation represents a goal currently identifiable as having distinct compatibility or performance advantages. The word *may* denotes a optional capability that could augment the standard. The standard is fully functional without the incorporation of this optional capability.

Suggestions for improvement of this document are welcome. They should be sent to the Alliance for Telecommunications Industry Solutions, IIF Staff, 1200 G Street NW, Suite 500, Washington, DC 20005.

The Quality of Service Metrics (QoS) Committee was responsible for the development of this document, with the leadership of the following people:

- S. Wright, IIF Chair (AT&T)
- D. O'Callaghan, IIF Vice Chair (Verizon)
- R. Streijl, QoS Committee Co-Chair (AT&T)
- K. Kerpez, QoS Committee Co-Chair (Telcordia)
- R. Chernock, IIF Technical Editor (Triveni Digital, an LG Company)
- C.A. Underkoffler, ATIS Chief Editor
- A. Blasgen, IIF Committee Administrator

CONTRIBUTORS

- Al Morton, AT&T
- Robert Streijl, AT&T
- John Williams, JDSU
- Richard Chernock, Triveni Digital, an LG company
