Development Committee on Load-Based and Climate-Specific Testing and Rating Procedures for  
Seasonal Performance of Heat Recovery and Energy Recovery Ventilators (HRVs and ERVs) 4

Preface 6

Sustainable Development Goals (SDG) Foreword 7

## 1 Scope 8

1.1 Applicability 8

1.2 Exclusions 8

1.3 Terminology 8

1.4 Units of measurement 9

## 2 Reference publications 9

## 3 Definitions 9

## 4 General requirements for determining performance 11

4.1 HRV/ERV performance 11

4.2 Alternate instrumentation 11

## 5 Instruments for determining performance 11

5.1 General 11

5.2 Temperature-measuring instruments 12

5.2.1 Requirements 12

5.2.2 Instrument types 12

5.2.3 Instrument accuracy 12

5.2.4 Instrument arrangement 12

5.2.5 Psychrometric measuring stations 12

5.2.6 Atmospheric pressure 12

5.3 Pressure-measuring instruments 12

5.3.1 Instrument types 12

5.3.2 Instrument accuracy 12

5.4 Power and electrical measuring instruments 13

## 6 Airflow measurement 13

6.1 General 13

6.1.1 Measurement methods 13

6.1.2 Instrument accuracy 13

6.2 Nozzles 13

6.2.1 Nozzle station diffusers 13

6.2.2 Arrangement of nozzles 13

6.2.3 Air density 14

6.2.4 Nozzle velocity 14

6.2.5 Nozzle calibration 14

6.2.6 Discharge area 15

6.2.7 Temperature variation 15

# Preface

This is the first edition of CSA SPE-18, *Load-based and climate-specific testing and rating procedures for seasonal performance of heat recovery and energy recovery ventilators (HRVs and ERVs)*.

This Document is not a consensus product; that is, it is not a Standard and it has not been formally reviewed or approved by a CSA Technical Committee.

CSA acknowledges that the development of this Document was made possible, in part, by the financial support of BC Hydro, Efficiency Manitoba, Hydro-Québec, Electricity Canada, Independent Electricity System Operator (IESO), NEEA, Fortis BC Gas, Ministère de l'Environnement, de la Lutte contre les Changements Climatiques, de la Faune et des Parcs (MELCCFP).

This Document is considered suitable for use for conformity assessment within the stated scope of the Document.

This Document was prepared and reviewed by the Development Committee on Load-Based and Climate-Specific Testing and Rating Procedures for Seasonal Performance of Heat Recovery and Energy Recovery Ventilators (HRVs and ERVs).

**Notes:**

- 1) *Use of the singular does not exclude the plural (and vice versa) when the sense allows.*
- 2) *Although the intended primary application of this Document is stated in its Scope, it is important to note that it remains the responsibility of the users of the Document to judge its suitability for their particular purpose.*
- 3) *This Document is subject to review within three years from the date of publication. All inquiries regarding this Document should be sent to [inquiries@csagroup.org](mailto:inquiries@csagroup.org).*
