Preface

This is the first edition of CSA TS-601, *Hydrogen fuel cell power systems for rolling stock*.

This Technical Specification (referred to as “this Document” from here on) is not a consensus product; that is, it is not a Standard and it has not been formally approved by a CSA Technical Committee.

CSA Group acknowledges that the development of this Document was made possible, in part, by the financial support of CPKC and Transport Canada.

This Document was prepared and reviewed for use in Canada and the U.S. by the CSA Task Force on Hydrogen Fuel Cells for Rolling Stock.

Notes:

- 1) *Use of the singular does not exclude the plural (and vice versa) when the sense allows.*
- 2) *Although the intended primary application of this Document is stated in its Scope, it is important to note that it remains the responsibility of the users of the Document to judge its suitability for their particular purpose.*
- 3) *This Document is subject to review within three years from the date of publication. All inquiries regarding this Document should be sent to inquiries@csagroup.org.*
