

Environmental labels and declarations— General principles

This Australian Standard® was prepared by Committee EV-003, Environmental Labelling. It was approved on behalf of the Council of Standards Australia on 14 September 2015. This Standard was published on 27 October 2015.

The following are represented on Committee EV-003:

- Accord Australasia
 - Association of Accredited Certification Bodies
 - Australian Chamber of Commerce and Industry
 - Australian Industry Group
 - Australian Window Association
 - Cement Concrete and Aggregates Australia
 - CHOICE
 - Deakin University
 - Housing Industry Association
 - Joint Accreditation System of Australia and New Zealand
 - Sustainable Business Australia
 - Think Brick Australia
-

This Standard was issued in draft form for comment as DR AS ISO 14020:2015.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee EV-003, Environmental Labelling.

The objective of this Standard is to harmonize the overarching principles used in the development, marketing and application of environmental labels and declarations on a national scale. This Standard sets out minimum criteria in order to—

- (a) facilitate a level playing field for global trade;
- (b) ensure the communication of verifiable and accurate information; and
- (c) give users confidence in environmental claims.

In the application of this Standard, specific care should be taken to ensure that local considerations are addressed to deliver accurate and relevant information.

This Standard is identical with, and has been reproduced from ISO 14020:2000, *Environmental labels and declarations—General principles*.

In the source text, references are made to the ISO 14020 series. Only Australian or Australian/New Zealand adoptions of the ISO 14020 series should be used.

As this Standard is reproduced from an International Standard, in the source text ‘this International Standard’ should read ‘this Australian Standard’.

AUSTRALIAN STANDARD

Environmental labels and declarations—General principles**1 Scope**

This International Standard establishes guiding principles for the development and use of environmental labels and declarations. It is intended that other applicable standards in the ISO 14020 series be used in conjunction with this International Standard.

This International Standard is not intended for use as a specification for certification and registration purposes.

NOTE Other International Standards in the series are intended to be consistent with the principles set forth in this International Standard. Other standards currently in the ISO 14020 series are ISO 14021, ISO 14024 and ISO/TR 14025 (see Bibliography).

2 Terms and definitions

For the purposes of this International Standard, the following terms and definitions apply.

2.1**environmental label****environmental declaration**

claim which indicates the environmental aspects of a product or service

NOTE An environmental label or declaration may take the form of a statement, symbol or graphic on a product or package label, in product literature, in technical bulletins, in advertising or in publicity, amongst other things.

2.2**life cycle**

consecutive and interlinked stages of a product system, from raw material acquisition or generation of natural resources to the final disposal

[ISO 14040:1997]

NOTE "Product" includes any goods or service.

2.3**environmental aspect**

element of an organization's activities, products or services which can interact with the environment

3 Objective of environmental labels and declarations

The overall goal of environmental labels and declarations is, through communication of verifiable and accurate information, that is not misleading, on environmental aspects of products and services, to encourage the demand for and supply of those products and services that cause less stress on the environment, thereby stimulating the potential for market-driven continuous environmental improvement.
