

AEROSPACE MATERIAL SPECIFICATION	AMS3095™	REV. B
	Issued 2001-02 Revised 2022-09	
Superseding AMS3095A		
(R) Paint System: High Gloss for Aircraft Exterior		

RATIONALE

This specification revision is necessary to clarify technical requirements and to place in standard G-8 specification format. It also satisfies the SAE Five-Year Review requirement.

1. SCOPE

1.1 Form

This specification establishes requirements for a high gloss paint system for use on commercial/business aircraft.

1.2 Application

The paint systems covered by this specification are typically applied to exterior surfaces of aluminum fuselage aircraft to protect against corrosion and to provide the required color schemes, but usage is not limited to such applications.

1.3 Classification

Specific classification of paint systems is not defined.

1.4 Safety - Hazardous Materials

While the materials, methods, applications, and processes described or referenced in this specification may involve the use of hazardous materials, this specification does not address the hazards which may be involved in such use. It is the sole responsibility of the user to ensure familiarity with the safe and proper use of any hazardous materials and to take necessary precautionary measures to ensure the health and safety of all personnel involved.

2. APPLICABLE DOCUMENTS

The following publications form a part of this document to the extent specified herein. The latest issue of SAE publications shall apply. The applicable issue of other publications shall be the issue in effect on the date of the purchase order. In the event of conflict between the text of this document and references cited herein, the text of this document takes precedence. Nothing in this document, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

SAE Executive Standards Committee Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be revised, reaffirmed, stabilized, or cancelled. SAE invites your written comments and suggestions.
